Description

SDI Promotions have equipped the venue, Maple Banquet Hall with state of the art Audio/Visual equipment.

The speakers located conveniently out of obstruction gives the rooms a very clean surround sound.

Each JBL 812 speaker is rated at 1600 watts programmed and can go up to 3200 watts peak, The spread of 70' x 70' limits the hotspots that are presented around the room. These are a better option than ground mounted speakers since most times than not, the volume at the front of the

room out levels the volume at the back of the room (front of the room is too loud and back of the room people are straining to hear)

The Draper Screens and Epson projectors have been mounted in the most convenient locations so everyone in the room can see. Each screen is 10' or 120" diagonal and each projector brightness is rated at 3000 lumen. This eliminates the need to have precious space wasted versus their ground mounted counterparts.

The Moving Fully Intelligent Chauvet 350 Lighting system is located ideally near the center of the room, giving the option of lighting up virtually any point in the room. These can be programmed to do a variety of colours and designs, Lighting up something simple as the Stage area or the grand entrance, to substituting for dancing lights at the end of the night.
